

geometric and topological methods pdf

In mathematics, geometric topology is the study of manifolds and maps between them, particularly embeddings of one manifold into another.

Geometric topology - Wikipedia

In mathematics, topology (from the Greek *τόπος*, place, and *λόγος*, study) is concerned with the properties of space that are preserved under continuous deformations, such as stretching, twisting, crumpling and bending, but not tearing or gluing.. An n-dimensional topological space is a space (not necessarily Euclidean) with certain properties of connectedness and compactness.
