graduate, in algorithms, and who were comfortable with the idea of mathematical proofs about the correctness of algorithms. The book assumes this level of preparation. The book also assumes some basic knowledge of probability theory (for instance, how to compute the expected value of a discrete random variable).

The Design of Approximation Algorithms

76-4 Handbook of Approximation Algorithms and Metaheuristics where $s(I, J)$ is the best alignment score between I and J . Alignments have positive scores, or otherwise, they do not exist, that is, $s(I, J) = 0$ iff there is no alignment between I and J .
