DCNR Homepage

Built in the 16th century, Holeslack is a Grade II listed building with original features that make a stay here extra special. The cottage's 16th-century spiral staircase, open brick fireplace and oak wood furniture reflect its farmhouse past, while contemporary fittings have been added for a comfortable stay.

Sizergh | National Trust

Sassafras is a genus of three extant and one extinct species of deciduous trees in the family Lauraceae, native to eastern North America and eastern Asia. The genus is distinguished by its aromatic properties,

which have made the tree useful to humans.

Sassafras - Wikipedia

The moss life-cycle starts with a haploid spore that germinates to produce a protonema (pl. protonemata), which is either a mass of thread-like filaments or thalloid (flat and thallus-like). Massed moss protonemata typically look like a thin green felt, and may grow on damp soil, tree bark, rocks, concrete, or almost any other reasonably stable surface.
