Calculating various bits about regular hexagons. Given length of a side x ... Tip to tip across the hex is $2x$. Height of the hex flat side to flat side is $2x(\sqrt{3}/4)$ or about $1.732x$. Area of the hex is $1.5(x^2 (\sqrt{3}))$ or about $2.56x^2$. Example: Making graph paper with 4 hexes per square inch

The regular rectangular or square grid is used more often than the hexagonal grid, but their relative merits have been little discussed. Here we compare rectangular and hexagonal grids for ecological applications. We focus on the reasons some researchers have preferred hexagonal grids and methods to facilitate the use of hexagonal grids.

Rectangular and hexagonal grids used for observation

Journal of Urban Design, Vol. 5, No. 3, 237-265, 2000 Hexagonal Planning in Theory and Practice ERAN BEN-JOSEPH & DAVID GORDON ABSTRACT Residential neighbourhood designs with street patterns based upon hexagonal blocks were proposed by several planners in the early 20th century.

hexagonal coordinate system [1]: "Image Conversion" Hardware capable of capturing images from the real world directly onto a hexagonal lattice is highly specialist, and so not generally available for use. Therefore, efficient means of converting a standard square-latticed image into a hexagonal one is

For the infinite square grid G , we show that it is optimal to save a 90 wedge of vertices. In Section 3 we formally introduce a measure of the surviving rate for infinite graphs and show that $\chi(G) = 1/4$. For the infinite hexagonal grid G_{hex} , we show that one neighbor can save $2/3$ of

Figure 1 Neighbourhood relations on a square grid. On a hexagonal grid there are no ambiguities in neighbourhood definitions, all six neighbours share an edge with the central cell, and are at the same distance from its center (Figure 2). Figure 2 Neighbourhood relations on a hexagonal grid.

Offset-Square Grid Paper. A compromise between a true hex-grid and a standard square grid, these PDF files consist of an offset square grid which provide the advantages of each type. I've taken to using it in preference to an actual hex-grid because it makes drawing regular forms (like rooms, for example) easier.
