Mathematical Finance Mathematical Finance is the study of the mathematical models ... Your investment of \$1 can either go up to \$5 with ... Why does Financial Mathematics Exist? Answer: Because financial institutions are selling extremely complex financial

An Introduction to Mathematical Finance

200 CHAPTER 5 Mathematics of Finance A deposit of dollars today at a rate of interest P for years produces interest of $t r I = Prt$. The interest, added to the original principal P , gives $P + Prt = P(1 + rt)$. This amount is called the future value of P dollars at an interest rate r for time t in years. When loans are involved, the future value is often called the maturity value of the loan.
