HSC Physics Notes " Medical Physics 9.4 " 1. The properties of ultrasound waves can be used as diagnostic tools 1. identify the differences between ultrasound and sound in normal hearing range Ultrasound is very high frequency sound. Ultrasound waves are sound waves with frequency greater than that of normal human hearing.

Chapter 6 deals with the special theory of Relativity. Problems are solved under Lorentz transformation of length, time, velocity, momentum and energy, the invariance of four-momentum vector, transformation of angles and Doppler effect and threshold of particle production. Chapters 7 and 8 are concerned with problems in low energy Nuclear physics.

The chapter that follows is dedicated to dosimetry, which is a major subject in medical radiation physics. It covers theoretical applications, such as different equilibrium situations and cavity theories, as well as experimental dosimetry, including ionization chambers and solid state and liquid dosimeters.
