In mathematics, computer science and operations research, mathematical optimization or mathematical programming, alternatively spelled optimisation, is the selection of a best element (with regard to some criterion) from some set of available alternatives.. In the simplest case, an optimization problem consists of maximizing or minimizing a real function by systematically choosing input values ...

In numerical analysis, fixed-point iteration is a method of computing fixed points of iterated functions.. More specifically, given a function defined on the real numbers with real values and given a point in the domain of , the fixed point iteration is  $x_{n+1} = f(x_n)$ , which gives rise to the sequence  $\{x_n\}$  which is hoped to converge to a point .If  $f$  is continuous, then one can prove that the ...

Health-care waste management • Rapid assessment tool 1 Introduction • In many (mainly low income) countries, improper management of wastes generated in health care facilities causes direct health impacts on the community, the personnel working in health care facilities, and on the environment. In addition, pollution due to inadequate treatment of waste can cause indirect health effects to ...

N-back is a kind of mental training intended to expand your working memory (WM), and hopefully your intelligence (IQ 1).. The theory originally went that novel 2 cognitive processes tend to overlap and seem to go through one central bottleneck. As it happens, WM predicts and correlates with IQ 3 and may use the same neural networks 4, suggesting that WM might be IQ 5.
