To find angles, we can use what are known as inverse trigonometric functions. On your calculator, the inverse trig functions will appear as SIN-1, COS-1, or TAN-1. The output of these functions should always be understood as angles.

Converting concentration \* s from ng/ $\mu$ l to nM is a common task in molecular biology labs. The need arises because quantification methods for DNA typically measure the mass \* per volume \* of nucleotides \* in a sample. But, many techniques (including DNA sequencing) require a known number of molecules (moles or nanomoles) to be added.

Solutions and Solution Sets In this section we introduce some of the basic notation and ideas involved in solving equations and inequalities. We define solutions for equations and inequalities and solution sets. Linear Equations In this section we give a process for solving linear equations, including equations with rational expressions, and we illustrate the process with several examples.
