

### **textile fabrics pdf**

A textile is a flexible material consisting of a network of natural or artificial fibres (yarn or thread). Yarn is produced by spinning raw fibres of wool, flax, cotton, hemp, or other materials to produce long strands. Textiles are formed by weaving, knitting, crocheting, knotting, felting, or braiding.. The related words "fabric" and "cloth" are often used in textile assembly trades (such as ...

African textiles were often made of animal hair and woven. Some of the oldest surviving African textiles were discovered at the archaeological site of Kissi in northern Burkina Faso. They are made of wool or fine animal hair in a weft-faced plain weave pattern. Some fragments have also survived from the thirteenth century Benin City in Nigeria.. Some examples of African textiles are the following:
